Professional Summary

I am a dedicated Full Stack Developer with one year of hands-on experience, passionate about leveraging technology to create impactful and efficient web solutions. With expertise in both the MERN (MongoDB, Express, React, Node.js) and PERN (PostgreSQL, Express, React, Node.js) stacks, I develop dynamic, end-to-end web applications. I am committed to continuous learning and excited about new opportunities to further refine my skills under the guidance of experienced mentors. Eager to contribute to innovative projects.

Technical Skills

- **Frontend:** HTML, CSS, JavaScript, TypeScript, React, Next.js, Tailwind CSS
- **Backend:** Node.js, Express.js, GraphQL, Stripe
- **Databases:** PostgreSQL, MongoDB

Experience

Alimcosot pvt limited | Full stack developer

oct-2023-oct-2024

Neeca | *Nextjs, TailwindCSS, graphql, postgress, express*

- Contributed to the development of the NEECA project, a critical Pakistani government initiative focused on energy efficiency and conservation, by working on both frontend and backend components.
- Collaborated with a team to create user-friendly interfaces that align with government standards, ensuring seamless user experiences for various stakeholders, including public users, government officials, and energy sector partners. Integrated Next-Auth for user authentication and session management.
- Played a key role in testing, deployment, and post-launch support, ensuring that the platform continues to meet evolving needs and performance expectations.

PolarPro | *React Js , tailwand css , Storyblock*

- Managed the maintenance and continuous improvement of PolarPro, a Germany-based e-commerce platform, ensuring a seamless and high-performance user experience for online shoppers.
- Provided ongoing technical support, including bug fixes, performance tuning, and system upgrades, to maintain the platform's stability and competitiveness in the e-commerce market.

Tracker | Next js, Express, Nest js,graphql, PostgreSQL

- Tracker system, handling the entire backend architecture using the MERN/PERN stack to support multiple modules including task management, project creation, attendance tracking, salary management, and employee recognition (awards and rewards).
- Designed and implemented the task creation and project management modules, enabling efficient task assignment, tracking, and reporting across multiple projects. Integrated role-based access controls to ensure secure and appropriate permissions for users.
- Continuously monitored and enhanced system performance, security, and reliability, ensuring a robust and scalable solution that meets business needs.

Personal projects

Job745

- Job745 is a dynamic platform connecting job seekers with employers.
- Allows users to post job openings and search for employment opportunities.
- Provides a seamless user experience for efficient job matching.
- Simplifies the hiring process for both employers and job seekers
